Dr. Harmon C. McAllister, Research Director
Council for Tobacco Research
900 3rd Avenue
New York, NY 10022

Dear Dr. McAllister:

Having submitted a full research proposal to the Council on March 13, 1989, I know that you will be interested to hear that I have received 1 of 12 Young Investigator Awards given this year by the Office of Naval Research. This award does not overlap with my submission to the Council. In particular, the award covers research concerning low temperature and high pressure crystallographic studies of enzymes.

I look forward to the decision of the Council regarding my full research proposal, "X-ray Studies of Novel Elastase-Inhibitor Complexes" (Case #2472). Many thanks for your consideration.

Sincerely yours,

David W. Christianson
Assistant Professor of Chemistry
